Março de 2019 - Edição 001

1) Realizar o download do programa (softphone) clicando no link abaixo:

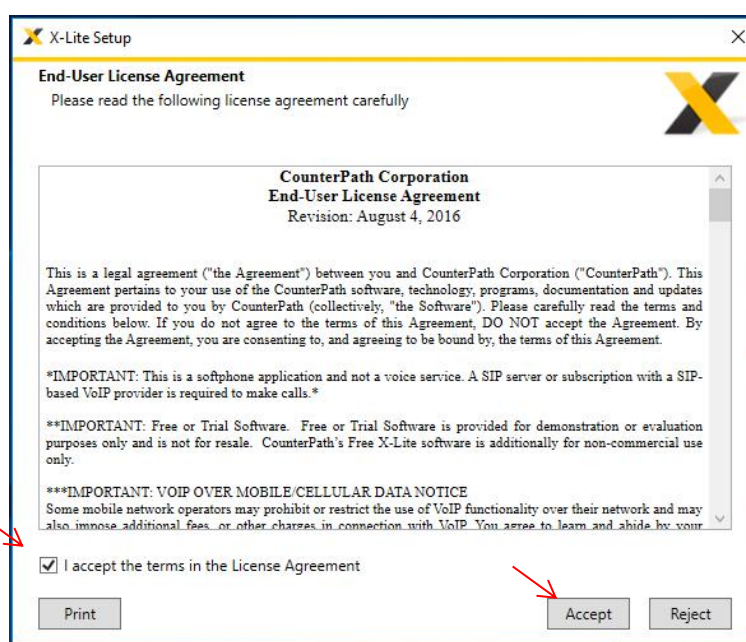

<https://www.counterpath.com/XLiteForWindows>

2) Instalar o programa:

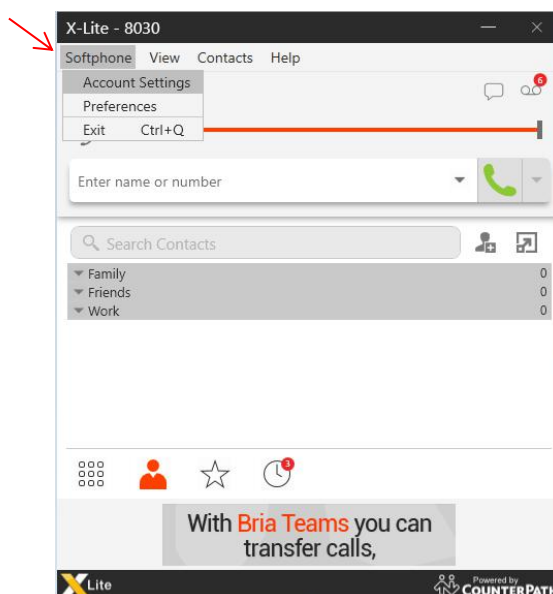

2.1) Executar o arquivo baixado:

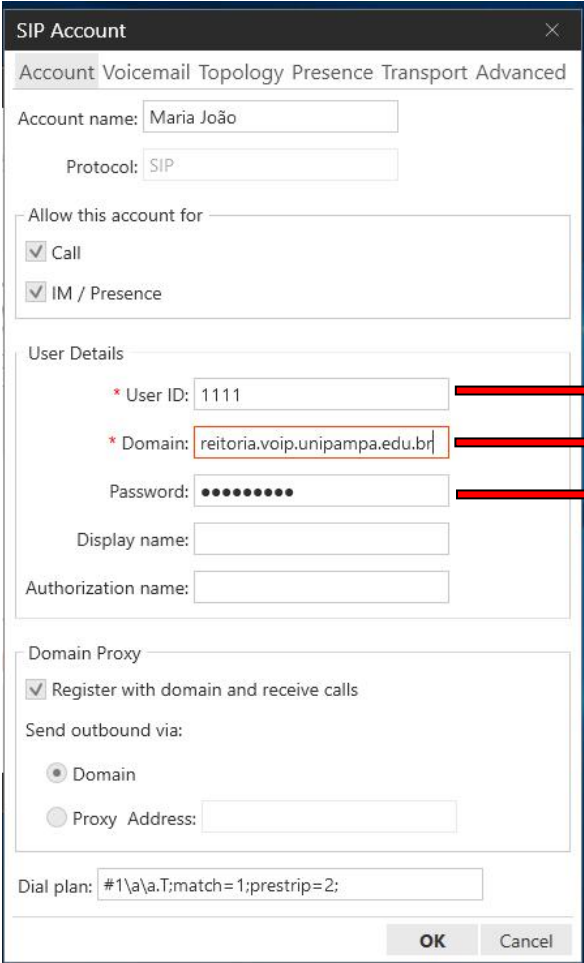

2.2) Ler e aceitar os termos de uso:

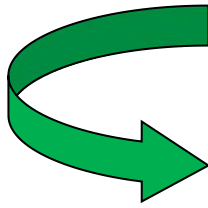

3) Configurar a conta VoIP:

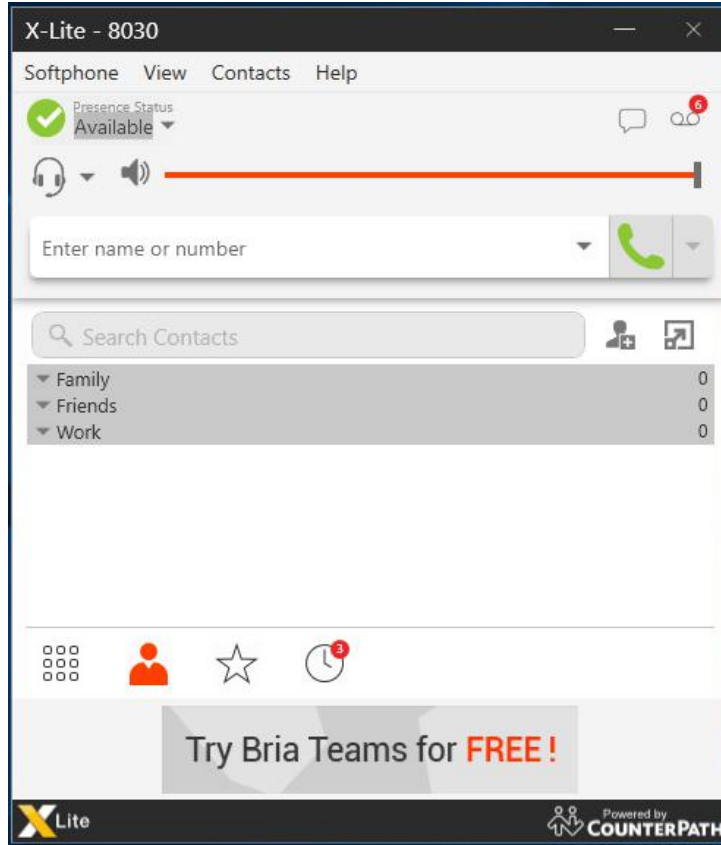

The image shows a 'SIP Account' configuration window with several tabs: Account, Voicemail, Topology, Presence, Transport, and Advanced. The 'Account' tab is active. The 'Account name' field contains 'Maria João' and the 'Protocol' is set to 'SIP'. Under 'Allow this account for', both 'Call' and 'IM / Presence' are checked. The 'User Details' section includes: 'User ID' (1111), 'Domain' (reitoria.voip.unipampa.edu.br), 'Password' (masked with dots), 'Display name', and 'Authorization name'. The 'Domain Proxy' section has 'Register with domain and receive calls' checked, and 'Send outbound via' set to 'Domain'. The 'Dial plan' is '#1\a\A.T;match=1;prestrip=2;'. Three red arrows point from the 'User ID', 'Domain', and 'Password' fields to external labels: 'Ramal', 'Domínio da unidade\*', and 'Senha VoIP' respectively.

\* Para obter o domínio da sua unidade clique [AQUI](#).

Indicação de que ramal foi corretamente configurado.

4) Configurar o dispositivo de áudio:
